-how it actually works for you

Gold Dust actually works. It gets into corners and crevices where fingers and washcloths can't reach. It permeates and dissolves dirt, grease and grime everywhere and it cleans and brightens everything.

Gold Dust does all this does this actual work-because it is made for that purpose.

0 0 0 Millions of women all over the country use Gold Dust three

times a day in washing dishes. They use it for scrubbing floors, washing windows,

But they do not realize all the uses of Gold Dust. Gold Dust is the only washing and cleaning powder needed in any home.

Gold Dust cleans metal work, nickel, enameled ware, etc., without scratching or marring the surface-leaving it sanitarily clean, bright and new-looking.

The use of Gold Dust is an economy. There can be no waste when you use the exact small quantity required for each specific purpose. It is at once taken up by hot or cold water, forming the perfect cleansing solution. * * *

The active principle of Gold Dust is a valuable antiseptic cleansing agent.

Use Gold Dust not only for

washing dishes, but for washing bathtubs and bathroom fixtures, cleaning oil mops, cleaning and freshening linoleum and oilcloth, cleaning and brightening pots, pans and cooking utensils, giving luster to glassware - for every cleaning and brightening purpose.

Gold Dust is as inexpensive as it is indispensable.
